

IN 2010 NEW APPOINTEMENT WITH MOVINT-EXPOLOGISTICA AT BOLOGNA FIERA

July 2009 – The 14th edition of **MOVINT**, International Industrial Handling Exhibition, and the 5th edition of **EXPOLOGISTICA**, Exhibition of Integrated Means, Systems and Services for Logistics and Transport, will take place contemporaneously from 27 to 29 May 2010 in Fiera Bologna. It is renewed therefore the double appointment with companies, operators and experts who deal with handling and logistics, after the flattering success of adhesions and participations in the last edition in 2007.

MOVINT-EXPOLOGISTICA is promoted by **AISEM** (Italian Association of Systems for Lifting, Elevation and Handling), **ANIMA** (Federation of the Italian Association of Mechanical and Engineering Industries), **FEM** (*European Maintenance Federation*), organized by **ASA** (Anima Services Company) and adhering to **CFI** (Industrial Fairs Committee)

Movint-Expologistica repeats the exhibition formula that, putting together the more classic and traditional products of industrial handling with the innovative information and data communications technologies applied to logistics, proves to be the most efficient to respond to the real market demands. In three days of exhibition manufacturers and exhibitors could compare the most qualified demand and offer of products and services which take part in all the phases of handling, control and management of goods inside and outside the firm.

For the first time, MOVINT-EXPOLOGISTICA offers an exhibition area dedicated exclusively to the second hand sector (machines, means, instruments). This is an important occasion for manufacturers, retailers and users who may have the possibility to seize new opportunities of business investing on machineries and instruments used rather than on new products.
